Plant Growth Type

Dwarf

- MAY144 is an early type and flat bush bean variety.
- Strong plants with high yields.
- Pods are fibreless, approximately 19-21 cm length and 1.9 - 2 cm width
- Suitable for processing and fresh market
- Long shelf life and very good cooking quality.
- High adaptation ability for stress conditions.
- Suitable for spring and autumn planting.
- Easy to harvest by hand.
- Seed colour is white.
- High resistance to Bean Common Mosaic Virus.

*The performance of the variety may vary according to the climatical conditions, cultivation practices and soil types.

Plant Growth
Type

Dwarf

- MAY195 is a early type flat bean variety with a compact, erect bush.
- Pods are very straight, uniform, light green bean with very good quality.
- Pods are smooth and approximately 18-19 cm in length and 1.5-1.6 cm width.
- High quality and extremely attractive pods.
- Strong plants with high yields.
- Shelf life is long and cooking quality is good.
- It is suitable for both hand and mechanical harvesting.
- Suitable for processing and fresh market
- High adaptation ability for stress conditions
- Suitable for spring and autumn planting.
- Seed colour is white.

*The performance of the variety may vary according to the climatical conditions, cultivation practices and soil types.

Dwarf

- Volare is a mid early type and flat bush bean variety.
- Glossy dark green green, uniform and fibreless pods
- Average pod length is 16-17 cm and pod width is 1.6-1.7 cm.
- Seed development is very visible in harvesting time.
- It has quality pods and high yielding potential.
- It has long harvesting period.
- Its cooking quality and taste is very good.
- Easy to harvest by hand
- Suitable for fresh market.
- Suitable for spring and autumn planting.
- Intermediate resistance to Bean Common Mosaic Virus.
- Seed colour is brown.

*The performance of the variety may vary according to the climatical conditions, cultivation practices and soil types.

Dwarf

- Magnum is a mid early type and flat bush bean variety.
- Well adapted variety with uniform, straight and without strings pods.
- Pods are smooth and light green colored.
- Its pod length is 19-20 cm and width is 1.4-1.5 cm on average.
- Long, narrow and high-quality pods.
- High yielding variety.
- It is suitable for hand harvesting.
- Suitable for fresh market.
- Suitable for spring and autumn planting.
- High resistance to Bean Common Mosaic Virus.
- Seed colour is brown.

*The performance of the variety may vary according to the climatical conditions, cultivation practices and soil types.

Plant Growth
Type

Dwarf

- Olivin is a mid early type round bean variety with a compact, erect bush.
- Pods are round, straight, smooth and glossy medium green colored.
- 14-15 cm extremely attractive pods long with 0.9-1.1 cm width.
- It produces strong plants with high yields.
- Its shelf life is long and cooking quality is good.
- It is suitable for both hand and mechanical harvesting.
- It is suitable for processing and fresh market
- It is a widely adapted variety with uniform pods.
- Suitable for spring and autumn planting.
- High resistance to Bean Common Mosaic Virus and Anthracnose; intermediate resistance to Halo Blight.
- Seed colour is white.

*The performance of the variety may vary according to the climatical conditions, cultivation practices and soil types.
